study days** across trusts
and hospitals

Features and Benefits

Medipal® Disinfectant Wipes support healthcare institutions to achieve both their clinical and budget targets. Using Medipal® disinfectant wipes will help infection prevention teams to fight infection and ensure healthy, clinically clean environments for patients.

0%

Alcohol Free

Gentle and Effective on the surfaces of medical devices.

Does not reduce surface life cycle as much as alcohol¹ and chlorine² based products.

Gentle pH level suitable for sensitive surfaces and frequent cleaning.

Ready to Use

Pre dosed, evenly impregnated wipes ensure **consistent performance**.

No need to add water or hazardous chemicals makes it simple and easy to use. Fast and easy to train infection control team.

Cleans & Disinfects

Time efficient as one wipe cleans and disinfects*.

Cost effective as no need to source a separate detergent, one wipe does it all.

Contains detergent for effective cleaning, enhances overall performance and disinfection.

Low foaming, low residue.

Advanced Wipe Material: Tritex³

Excellent solution retention, prevents liquid from 'pooling' at the bottom.

Efficient solution release, ensures the disinfectant is evenly transferred to the surface.

High strength in both direction even when wet.

Ultra low linting to greatly reduce the risk of contamination and cross infection.

Kills **99.9999%** of Bacteria
– 6 Log reduction.

Proven Rapid Biocidal Action

* **Bactericidal (including TB)**

* **Virucidal**

* **Yeasticidal**

* **Fungicidal**

23 Micro Organisms Tested⁴

Broad spectrum of activity against most pathogenic micro organisms including
Acinetobacter
HIV
HEP B and C
MRSA
Norovirus
VRE

European Standard (EN) Healthcare specific

* EN13727

* EN14476

* EN14348

* EN14561

* EN14563

*if surface heavily soiled, it will need to be wiped twice
