MARLUX MEDICAL

100% Recyclable Privacy Curtains

Welcome to your Marlux Medical Curtain Recycling Journey!

We're delighted to have you join our exclusive Privacy Curtain Return and Recycle Programme, making recycling your Marlux Medical curtains easier than ever.

By participating in this programme, you are taking an important step in responsibly managing your used non-clinical waste curtains and contributing to a circular economy in healthcare - one curtain at a time.

Your Return & Recycle Starter Pack Includes:

- 1x Recycling Bin to kickstart your journey
- 1x Reusable Lid (please keep and reuse)
- 1x Reusable Sleeve (please keep and reuse)
- 1x Infographic Poster to display above your Recycling Bin

Here's How it Works:

- **Set Up Your Recycling Bin:** Use the items in your Return & Recycle Pack and follow the instructions at recycle.marluxmedical.com to set up your Recycling Bin.
- **Pack your Recycling Bin:** Roll up the used curtains neatly and stack them into the Recycling Bin. Pack the same quantity of curtains into the box as was originally delivered.
- **Request a Collection:** When your Recycling Bin is full, tape the box securely for transport and request a collection via the QR code or visit our website. *Note: Before your first collection, we'll email you an annual waste transfer note for signature.*
- **Continue the Cycle:** Swap the full bin with a new one, reusing the lid and sleeve. Future orders will arrive in dedicated boxes which transform into Recycling Bins, keeping the process going!
- **Auto-Ship and Exchange Reminders:** We will send you reminders and ensure your replacement stock arrives in advance, avoiding the pressure of last-minute orders.
- **Recycling Reports:** You'll receive regular updates on your recycling achievements, along with detailed metrics for your sustainability reports.

What Happens to Your Used Curtains?

Your used curtains will be returned to our sorting facility and later processed into polypropylene pellets at our recycling partner in the North West.

MARLUX MEDICAL

100% Recyclable Privacy Curtains

Terms and Conditions

To comply with all relevant regulations, we've outlined the terms and conditions of the Privacy Curtain Return and Recycle Programme. By signing up, you agree to these terms.

1. All curtains set aside for collection must be appropriately labelled, and reboxed in a Marlux Medical box.
2. None of the curtains for collection have been exposed to any clinical infection or hazardous waste material, which, under The Environmental Protection Act and duty of care regulations, would require them to be incinerated or collected by a licensed hazardous waste company.
3. The curtain waste is classified under the 20-01-39 Plastic Absolute Non-Hazardous classification and will retain this classification throughout the recycling process. Marlux Medical holds a T4 exemption (registration number WEX311947) to sort, bale, and transfer to the reprocessing point under this classification. Any curtain waste classified under a different code cannot be collected under this programme.
4. A waste transfer note, signed and dated, valid for 12 months, is required to collect your curtain waste. Failure to provide this will result in the cancellation of the collection, and additional charges may apply to rearrange it.
5. Only Marlux Medical curtains and packaging can be accepted in the returned box. If the box is incorrectly packed or contains items other than Marlux Medical curtains and associated packaging, the waste will be returned to the collection site and additional charges will apply.
6. If more boxes are collected than outlined in your annual subscription, additional costs may be incurred.

We're excited to embark on this curtain recycling journey with you and build a community committed to recycling non-clinical curtain waste.

If you have any questions or need further assistance, please contact us at cs@marluxmedical.com.
